

# Skillbuilder: Summarize

Before agriculture, or farming, people lived by hunting animals and gathering plants. Around 9,000 years ago, some Paleo-Indians began to use agriculture to feed themselves. They gathered seeds of useful wild plants and learned to grow them as crops. People stopped migrating and began staying in one place to take care of their crops. A steady supply of food was available, and the population grew. Over time, the Paleo-Indians built large villages and cities.

## Practice

Read the paragraph. Fill in the chart below. Then write a summary of the information.

**5. Summary:** \_\_\_\_\_  
 \_\_\_\_\_

## Apply

Read "Tlingit Clans" in Lesson 2. On a separate sheet of paper, make a chart like the one above. Then write a summary of the information below.

**Summary:** \_\_\_\_\_  
 \_\_\_\_\_
